

MELANI DE SILVA

BUSINESS ANALYST | Agile Delivery | Certified Scrum Product Owner

Full Work Rights | +61 413 779 340 | melanidslv@gmail.com | linkedin.com/in/melanidesilva

PROFESSIONAL SUMMARY

Business Analyst with 5+ years' experience delivering technology and process improvement projects across healthcare, e-commerce and AI, data analytics. Strong track record in requirements elicitation, workshop facilitation, current/future-state process mapping, and UAT coordination through to go-live including delivery two weeks ahead of schedule with zero critical defects. Applies AI tools across the BA lifecycle to accelerate documentation, acceptance criteria and validation. Completed a Master of Data Science (Business Analytics) at Deakin University.

CORE COMPETENCIES

Business Analysis: Requirements elicitation & documentation, BRDs, functional & non-functional specifications, user stories & acceptance criteria, gap analysis, requirements traceability, wireframing (Balsamiq)

Process & Improvement: Current & future-state process mapping, process improvement, workflow documentation, business cases, risk & issue management

Delivery: Agile/Scrum, Kanban, hybrid & Waterfall, sprint planning & backlog refinement, UAT planning & coordination, defect management, change & implementation support

Stakeholders: Workshop facilitation, senior stakeholder engagement, cross-functional and distributed team coordination, executive reporting

Tools: Jira, Confluence, Power BI, SQL, Excel, SharePoint, Balsamiq, Trello, AI-assisted analysis tools

Domains: Healthcare systems, e-commerce platforms, data & AI initiatives

PROFESSIONAL EXPERIENCE

Business Analyst & Project Manager | Veracity Australia

Feb 2023 – July 2026

- Managed end-to-end BA and PM responsibilities for an e-commerce, AI and Data platforms delivered two weeks ahead of schedule with zero critical defects, across distributed teams in four countries.
- Elicited and documented 100+ user stories with acceptance criteria; maintained requirements documentation and traceability in Jira and Confluence as the single source of truth.
- Facilitated requirement prioritisation workshops that resolved scope conflicts between Australian and Singapore stakeholders, aligning an MVP scope and phased delivery approach that shipped on time.
- Coordinated UAT across 200+ users in healthcare and e-commerce; wrote test cases against acceptance criteria, tracked 150+ defects in Jira and managed resolution through to sign-off.
- Translated complex technical requirements into business language for C-suite stakeholders; built executive Power BI dashboards and weekly reporting that cut meeting time by 30%.

Business Analyst | International Integrated Health Solutions

Sep 2021 – Feb 2023

- Facilitated 20+ requirements workshops with healthcare and e-commerce clients; delivered BRDs, functional specifications and 150+ user stories with clearly defined acceptance criteria.
- Converted vague requirements into measurable, testable specifications - reducing UAT defects by 40% and improving stakeholder alignment on solution design.
- Produced Balsamiq wireframes and low-fidelity prototypes ahead of build, cutting scope changes by 50% during development.
- Managed Jira boards for three concurrent projects - stories, defects, requirement-to-test-case links and sprint velocity - achieving a 95% sprint goal completion rate.
- Partnered with developers and architects to unblock delivery, providing same-day clarification and solution options balancing business needs with technical constraints.

Business Analyst & Project Manager | SevenSigns

Jul 2020 – Sep 2021

- Supported BA and PM delivery across e-commerce and data analytics projects for eight clients, producing functional specifications that development teams implemented without rework.
- Maintained risk registers, schedules and weekly status reporting across five concurrent projects; zero missed critical deadlines.

DATA & AI PROJECTS

Content Engagement Prediction using Graph Neural Networks – Master's Thesis, Deakin University

- Modelled audience engagement across 15 content categories on a 32M+ comment dataset using Python, identifying which content types and behaviours drive interaction.

Promotion & Category Analytics – Power BI, Deakin University

- Analysed ~19,500 transactions across four stores; found promotions drove under 8% of revenue while two categories drove ~70% of sales, and turned the findings into a promo-ROI and range review.

EDUCATION

Master of Data Science (Professional) – Business Analytics | Deakin University, Melbourne

- STEM Academic Excellence Scholarship recipient; High Distinction average.
- Key units: Machine Learning, Data Wrangling, Statistical Data Analysis, People Analytics.

Bachelor of Science (Special) – Computer Science | Wayamba University of Sri Lanka

Second Upper Honours; Faculty Award for Outstanding Achievement; research publications in computer vision and IoT security.
